

“ORTHOLAZER IS NOT COVERED BY INSURANCE... IS IT WORTH IT?”

Yes! In fact, over 93% of our patients would return to OrthoLazer for treatment again. Here are the top five reasons that OrthoLazer laser therapy is one of the best investments you can make:

1. **OrthoLazer laser therapy works!** It reduces pain and inflammation for a variety of conditions, including post-surgical pain, musculoskeletal injuries, arthritis, and neuropathic pain.
2. **Speed of results:** You can feel better in days – not weeks or months.
3. **Long-term cost savings:** Laser therapy helps eliminate pain to keep you moving. It may also help defer or eliminate the need for surgery. This may mean fewer doctor visits, medications, or other treatments over time.
4. **No drugs, no needles, no downtime.** Laser therapy treatments are painless, and do not require medication or any recovery time.
5. **It's an incredible value.** Six laser therapy treatments are less than \$500! Imagine feeling better and healing faster in just six 10-minute treatments for an acute injury. Many of our chronic pain sufferers get relief in just 12 visits – sometimes after years of struggling to find relief.

Don't just take our word for it. See what patients have to say about their OrthoLazer experience:

“Within two weeks of treatment, the pain from my hip surgery went from a 9 [out of 10] to a 3!

Everyone was extremely pleasant and professional, appointments always on time. Highly recommend for post operative care!”

Nancy P.

“OrthoLazer gave me my life back. I have had chronic knee pain for years and thought my only hope was surgery. After my treatments I haven't had any knee pain since. They also helped fix my tricep that was causing me pain when extending my arm out fully. I highly recommend this place to everyone!”
